

Securing Health Systems, Protecting Data and Managing Risk

FACT SHEET

IT Services & Infrastructure

In line with the benefits of more advanced health IT is the pressure on health organizations to prepare infrastructures, processes and employees to defend the enterprise in an increasingly challenging cyber landscape. General Dynamics Health Solutions provides organizations with the security methodologies and advanced technology necessary to protect their systems, safeguard personally identifiable information and health information, meet compliance mandates and avoid the costly implications of a security breach.

Protecting Your Organization Against Malicious Threats

General Dynamics Health Solutions provides a full spectrum of security services to monitor and protect healthcare systems and data. Proactive defense solutions assist organizations in building a strong, HIPAA-compliant security program, which monitors, tests and analyzes threats to the enterprise. Organizations benefit from immediate detection of unwanted activity, along with real-time notifications and end-to-end incident response. Risks, threats and impacts to the enterprise are mitigated through the implementation of proven technologies, expert governance and mature security management methodologies, maximizing return on investments while safeguarding data and infrastructure.

“Worldwide, the average cost of a healthcare breach is \$363 per exposed personally identifiable record, higher than any other industry.
